# Contact information

Learn about our background and strength

# Company profile

## Company profile

# History and development

## Company development history

### Early development

Since its establishment in 1986, the company has focused on the manufacturing of chemical pipe fittings and gradually expanded its production scale.

### Technology accumulation

After more than 40 years of industry accumulation, the company has formed a deep technical heritage and experience advantages.

### Market expansion

Products have been widely used in many domestic chemical fields, and gradually expand the international market.

### Innovation breakthrough

Continue to carry out technological innovation, improve product competitiveness, to meet the diversified needs of the market.

# Corporate culture

## Corporate culture

### **integrity-based**

Adhere to the integrity of management, and establish long-term stable cooperative relations with customers.

### **Quality first**

Strictly control product quality to ensure that every product meets high standards.

### **Customer first**

Customer needs first, to provide quality pre-sale, sale and after-sales service.

### **innovation-driven**

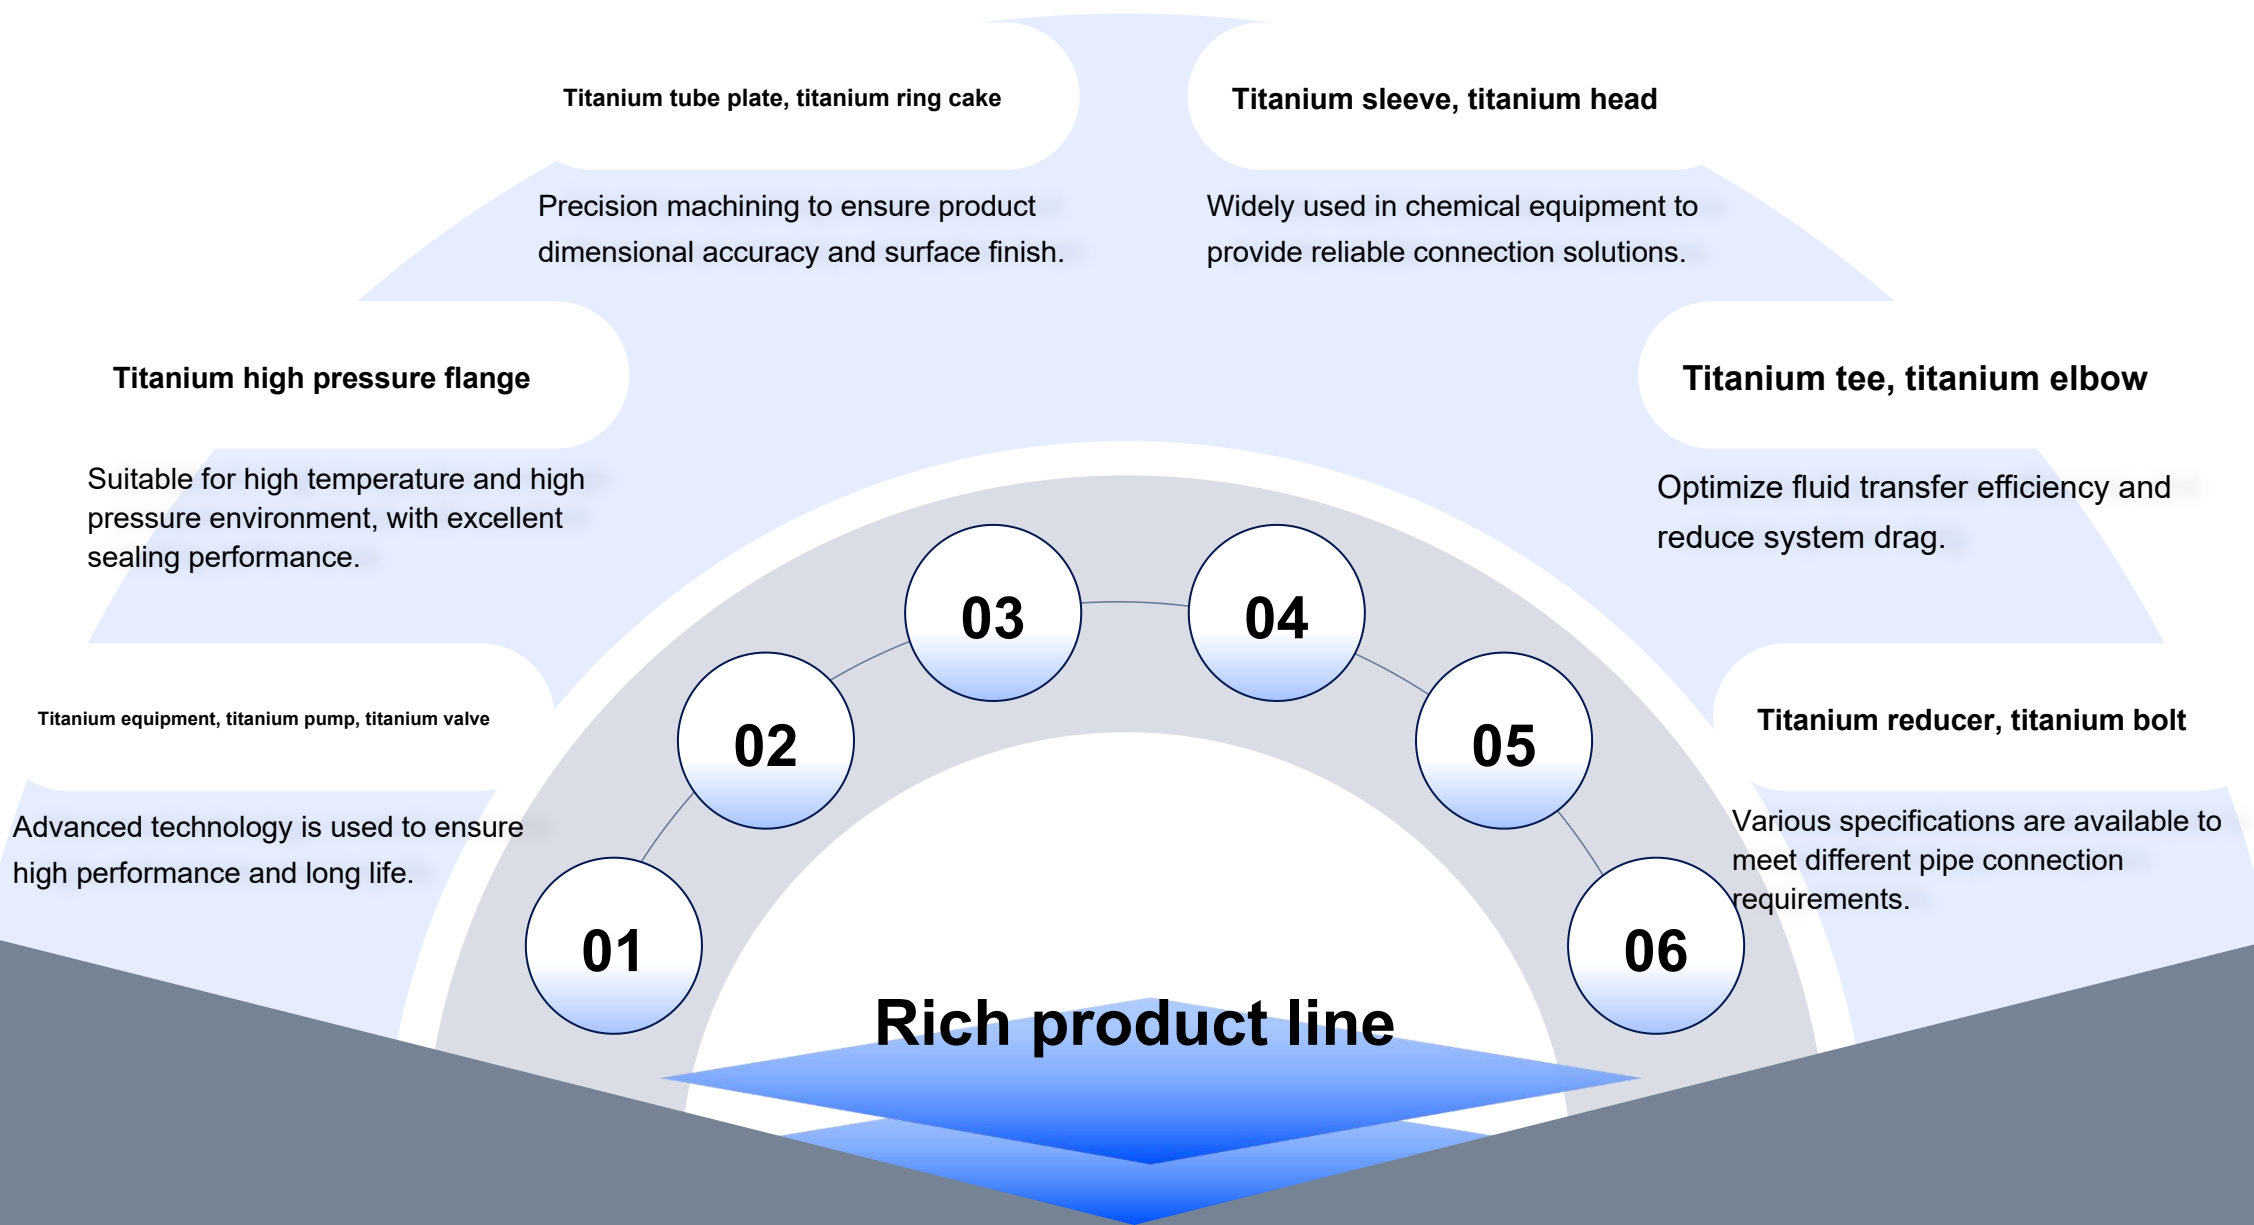

Continue to carry out technological innovation to enhance the core competitiveness of enterprises.

# Products and services

Provide a variety of chemical pipe solutions

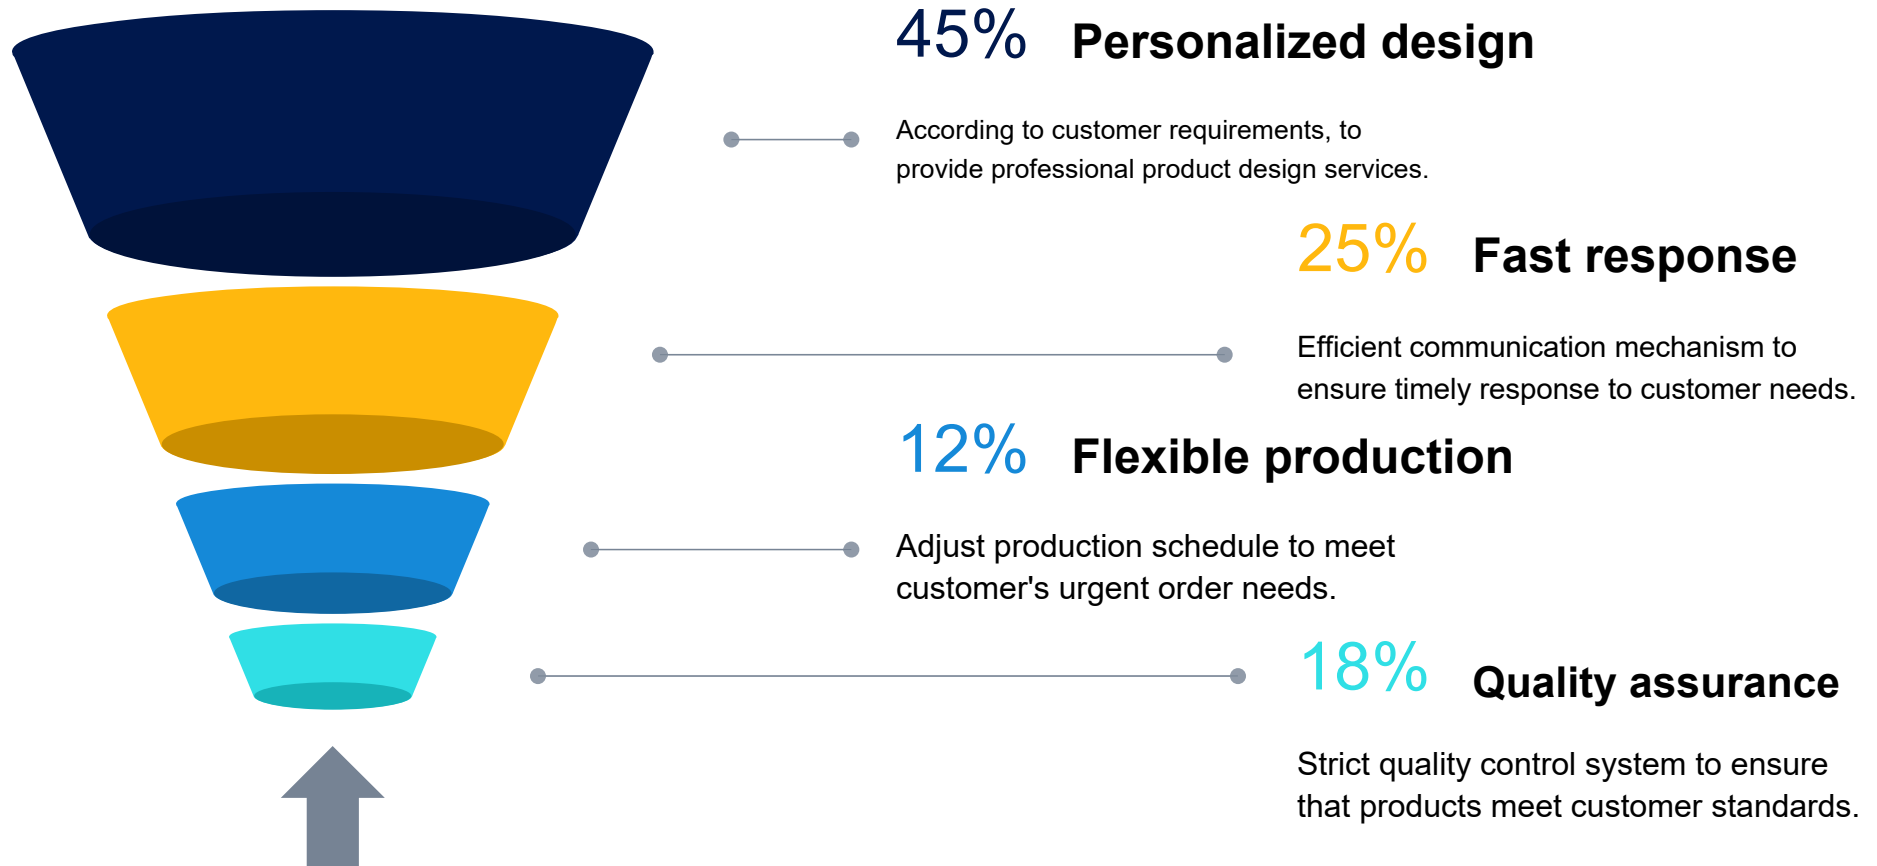

# Main product

# Customized service

Meet the individual  
needs of customers

# Quality control

Ensure high quality standards for products

## Raw material inspection

Strictly control the quality of raw materials to ensure that products meet standards from the source.

**36K**

## Production process monitoring

The whole process monitoring system is used to ensure that every process meets the quality requirements.

**52K**

## Inspection of finished product

Comprehensive inspection of products before leaving the factory to ensure stable and reliable performance.

**62K**

## Quality feedback mechanism

Establish a perfect quality feedback mechanism to deal with customer feedback problems in time.

**92K**

# Technical strength

Strong technical support and R & D capability

# Technical patent

## A number of technical patents support

# Software copyright

01

## Design software

Design software with independent intellectual property rights to improve design efficiency.

02

## Management software

Use advanced enterprise management software to improve management efficiency.

03

## Software application

Software is used to optimize production processes and ensure product quality.

04

## R&d platform

Establish a sound R&D platform to support technological innovation and product upgrading.

## Self-developed software system

# Research and development facility

## Advanced research and development equipment and laboratories

### Laboratory equipment

Equipped with advanced experimental equipment to support all kinds of material testing and analysis.

### Research and development environment

Provide a good research and development environment to promote innovation and technology exchange.

### Equipment renewal

Update research and development equipment regularly to maintain technology leadership.

### Cooperative research and development

Cooperate with scientific research institutions to improve R&D capabilities and technical level.

# Market and customer

Extensive market coverage and customer recognition

# Market distribution

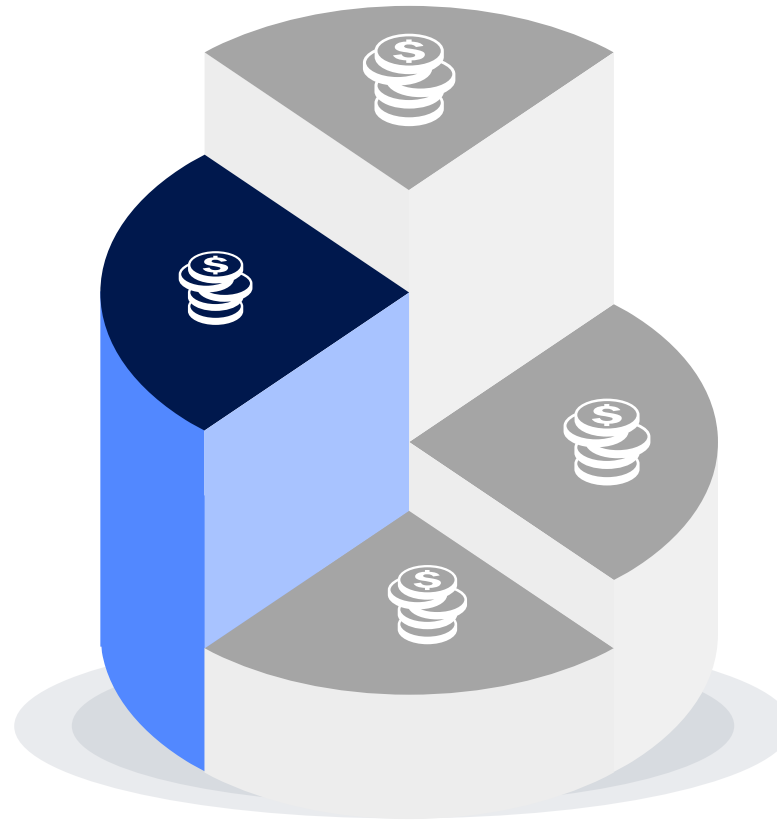

**Products cover the national and international markets**

## **International market**

Actively explore the international market, products are exported to many countries and regions.

## **Marketing strategy**

Develop flexible marketing strategies to meet different market needs.

## **Domestic market**

Products sell well all over the country, widely used in the field of chemical industry.

## **Business partner**

Establish long-term and stable cooperative relations with many well-known enterprises.

# Customer feedback

## Customer satisfaction

Conduct regular customer satisfaction survey to ensure that customer satisfaction is above 95%.

# Customer recognition and support

## Customer case

Share successful cases and show the excellent performance of products in practical applications.

## Customer maintenance

Establish a sound customer maintenance system and provide continuous technical support.

## Customer evaluation

Collect customer feedback and continuously improve product and service quality.

# Honor and qualification

## The honors and certifications obtained

### High-tech enterprise

Recognized as a national high-tech enterprise, with a number of independent intellectual property rights.

### Industry certification

Through a number of industry certifications to ensure product quality in line with international standards.

### Credit enterprise

For many years won the "contract, keep promises" enterprise title, reputation.

### Social responsibility

We will actively fulfill our social responsibilities and promote local economic development.

# Contact information

Look forward to working with you

# Contact information
